

Outcomes 101 for Grantseekers

Jen Riley, chief impact officer, Our Community

November 2022

We would like to begin today by acknowledging the Traditional Custodians of the lands on which we are working today, and the Aboriginal and Torres Strait Islander people participating in this training.

We pay our respects to Elders, past and present, and recognise and celebrate the diversity of Aboriginal peoples and their ongoing cultures and connections to the lands and waters.

Jen

- Chief Impact Officer at SmartyGrants
- 20 plus years social sector experience
- Specialised in outcome measurement and monitoring and evaluation
- Ran a grants program at United Way Australia
- Board Director on an NGO
- Mum of two children

What will we cover :

1. What outcomes are and what an outcomes orientation is.
2. Difference between objectives, outputs and outcomes.
3. Understand the relationship of a theory of change to outcomes and activities.

Got a question?
Scan me!

Why measure outcomes?

- Being **accountable** for what we say we will do
- **Assess** if anything is changing for the people, environment or other intended beneficiaries.
- **Learn** about what is working well and what we could do better, **continuous improvement**
- **Funders** are asking for it....and some will only 'pay for outcomes'.

Got a question?
Scan me!

What are outcomes?

Benefits or **changes** for the individuals or organisations engaged in a project/program/ initiative.

i.e., changes in what people do, think, know or can do, or what their condition

- **B**ehaviour - exercising daily
- **A**ttitude - women are equal
- **C**ircumstances/conditions - employment/housing status
- **K**nowledge - know how to access housing rights
- **S**kills – how to manage a household budget

Got a question?
Scan me!

OUTPUT
5,000 car seats

Safe Child,
Reduced harm
in accident

OUTCOME
(or the benefit or
consequence)

Got a question?
Scan me!

Increased knowledge,
Reduced debt

OUTPUT
10 literacy classes
20 hours of teaching

OUTCOME
(or the benefit or consequence)

Got a question?
Scan me!

We need both outputs and outcomes

Outcomes don't exist with outputs, and outputs require an intended outcome (purpose).

What you do/deliver (Output)

Short-term Outcome

Medium term Outcome

Long-term Outcome

Outcomes orientation

IS OBSESSED WITH THE CLIENT (B.A.C.K.S)

- Requires us to start with the intended beneficiary, what are **their** challenges, their needs, their issues, their constraints, their priorities? What do **they** want to do differently?
- As opposed to what **we** do.
- Is about the experience of the end-user or intermediary.
- This is about thinking about what next – after the activity – what is changing for them.

Got a question?
Scan me!

What is the output? What is the outcome?

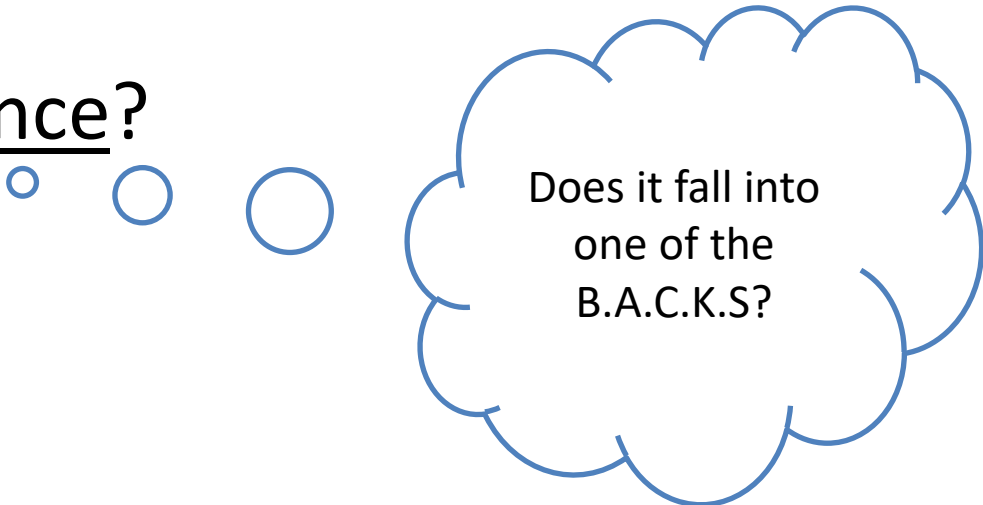

What is the output? What is the outcome?

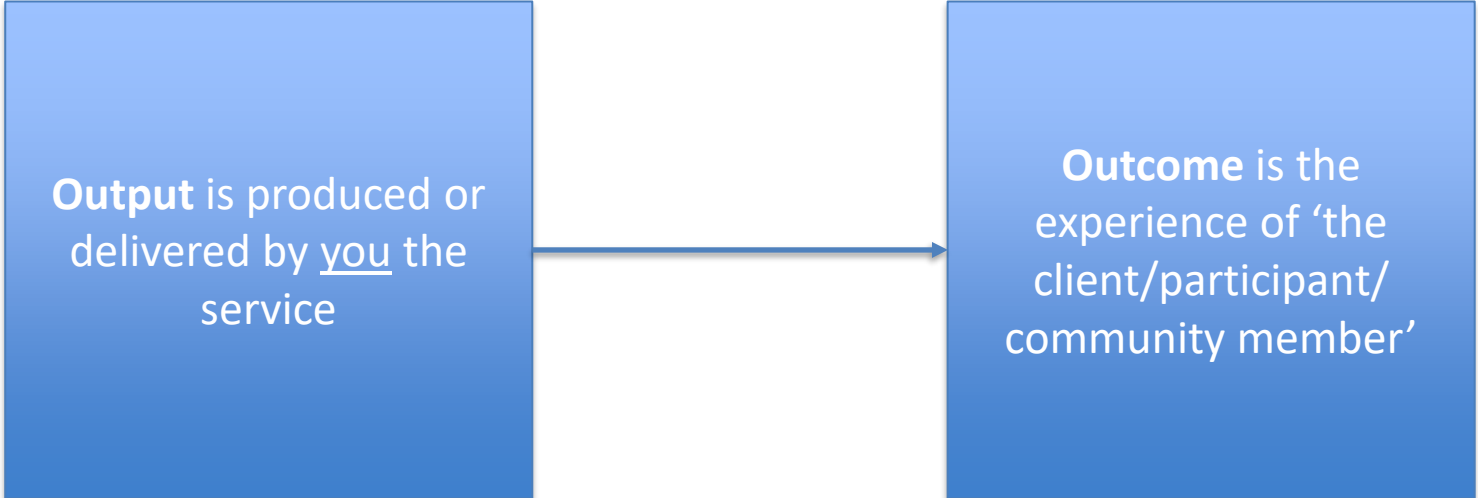

Apply this.... Output or outcome?

- What about attendance?

Does it fall into
one of the
B.A.C.K.S?

Apply the rule:

Output is produced or
delivered by you the
service

Outcome is the
experience of 'the
client/participant/
community member'

Apply this.... Output or outcome?

- What about access?

Apply the logic:

From objective to outcome

We want to increase access for people from CALD backgrounds to attend community events.

Why? To what end?

What benefits do you want the end-user to have?

Got a question?
Scan me!

“So that more people are connected to each other, spend money and generate income for local business, build sense of community cohesion...”

Got a question?
Scan me!

“So that more people are connected to each other, spend money and generate income for local business, build sense of community cohesion...”

Got a question?
Scan me!

The three outcomes...

1. connected to each other,
2. generate income for community,
3. build sense of community cohesion...

Got a question?
Scan me!

Your three outcomes statements

1. Increase **social connection** across the community
2. Increase **income for local business.**
3. Increase **sense of community cohesion** across the community.

Got a question?
Scan me!

Unpacking the outcome statement

Tip: write in the past tense – what happened?

Increased daily exercise for residents

Outcomes are generally
an increase,
decrease/reduction...

What is changing i.e.
BACKS

For who i.e. residents

Got a question?
Scan me!

When do outcomes occur?

Very Short Term	Short Term (immediate)	Medium Term (next few weeks)	Long term (next 12 months)	Long Term (10 years)
Attendance at webinar	Improved knowledge about outcomes measurement	Identified outputs and outcomes in your program	Measuring outcomes and learning what is working and not working.	Improved community outcomes for the community
i.e. Behaviour	i.e. Learning Awareness, Skills, Opinions, Aspirations, Motivations	i.e. Action Behaviour-change, practice,	i.e. Action Behaviour, practice, decision-making, policies, social action.	i.e. Conditions Social, Economic, Environmental, Civic

Another way to conceptualise this

Population level
Reduction in cardiovascular illness

Long term (1 year plus):
Reduction in high blood pressure in residents.

Medium term (3 – 12 months):
Increased daily exercise in residents.

Short term (i.e. immediate to 90 days):
Improved knowledge of healthy lifestyle in residents

What is wrong with these ‘outcomes’?

“Creates social/economic benefit”

“Promote opportunities for lifelong learning.”

Got a question?
Scan me!

Who has outcomes?

Primary beneficiaries – those who are intended to be better off as a result of the program. i.e. a children

Secondary beneficiaries – those not directly targeted but may benefit. For example, a country sports program may impact the wider community and contribute to a sense of community cohesion.

Intermediaries – the people or groups that you work through to achieve your program goals, they may also be ‘better off’ as the result of the intervention.

End-user outcomes or intermediary outcomes?

Early literacy program for under 5s

Outcome : Increased daily reading with child

Outcome : Improved early literacy skills

Intermediary : Parent

Primary Beneficiary : Child

Got a question?
Scan me!

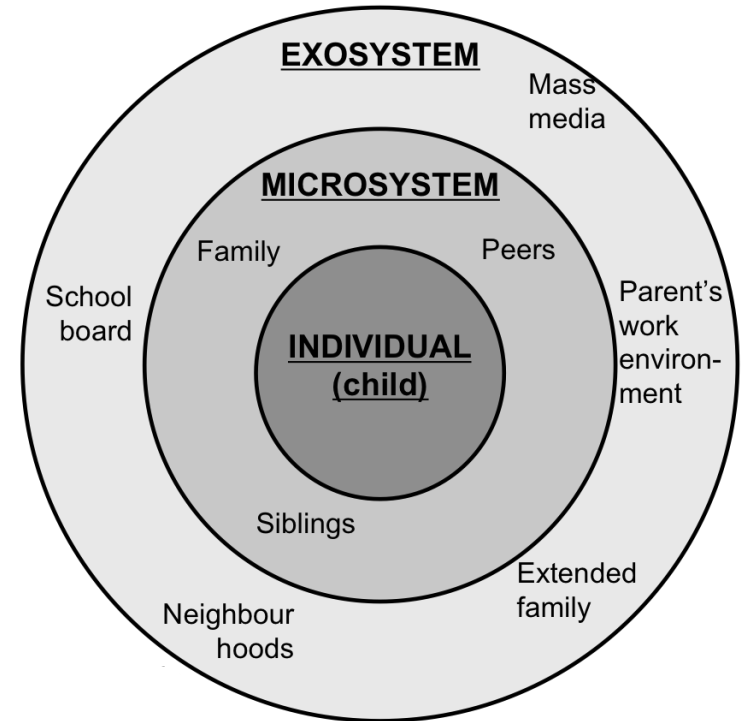

Who has outcomes?

Individuals i.e., children, family members, staff, volunteers, policy makers, funders.

Groups i.e., tenancy groups

Organisations or **population** groups i.e., citizens of Greater Dandenong.

Based on Bronfenbrenner's ecological systems theory (1979)

Population vs Program Outcomes

Population level outcomes

i.e. Improved mental health for **City of Greater Dandenong**

Program level outcomes

i.e. Improved mental health for **program cohort i.e. the 25 participants engaged in the training course**

How do we come up with Outcomes?

- Should be part of wider strategic planning and program design process.
- What change do we want to create?
- Where are we now (current state)? Where do we want to be (future state)?

Yes but how??

We develop a theory or a hypothesis.....of how we will contribute to the change.

We call this a ‘theory of change’ or sometimes people call these ‘Logic models’

- Change theories are well-documented i.e. bandwagon effect, diffusion theory, social modelling etc.
- We can also have our own theories.

Applying for Grants

- Want to know what outcomes their investments are contributing to.
- Granters want you to report on *what you do* (activities and outputs) **AND** *the changes* you are helping to create for your beneficiaries.
- You will be required to outline your **intended outcomes** in your applications.
- SmartyGrants now has an ‘Outcome Engine’ and other Granting software have their own “in-built” outcome questions.

What is the Outcome Engine?

1. Series of standard questions that funders can add to application and acquittal forms.
2. The option for Grantmakers to **upload an Outcome Framework** (list of outcomes and measures) into the system.

You need to be ready to fill out outcome questions in grant **applications** (before the grant round opens!)

Outcome default “Standard Section”

Section 2

Outcomes

Please tell us about the outcomes you expect to result from your project. Outcomes are the changes you expect to occur for the beneficiaries of your project. Generally outcomes can be framed as an increase or decrease in one or more of the following:

- Skills, knowledge, confidence, aspiration, motivation (these are generally immediate or short-term outcomes)
- Actions, behaviour, change in policy (these are generally intermediate or medium-term outcomes)
- Social, financial, environmental, physical conditions (these are generally long-term outcomes)

Immediate outcomes occur directly following an activity (e.g. within 1 month); medium-term outcomes are those that fall between the short and long-term outcomes (e.g. between 1 month and 2 years); and long-term outcomes are those we expect to see years later (e.g. 2, 5, 10 or 50 years after the activity).

Your outcome	Timeframe	Alignment with our outcome goals	How does your intended outcome link to our outcome goals?	Explanatory notes
Must be no more than 20 words. What changes do you expect will occur as a result of your project (e.g. Enhanced physical fitness)? Please be brief. One per row.	When do you expect this outcome to emerge?	No more than 1 choice may be selected. Which of our outcome goals will your project contribute to? If multiple apply pick the most relevant.	Must be no more than 100 words. Please explain how your intended outcome helps contribute to ours.	Must be no more than 100 words. Add notes if you need to provide more context.
